

BUSINESS FOR BIOSCIENTISTS CERTIFICATE

Department of Business Administration, College of Business Administration; Department of Biology, College of Arts and Sciences

Vision Statement

This certificate program provides a basic understanding of business principles to biomedical PhD students. While UNMC PhD students receive extensive training in research methods and the principles of biology and medicine, they receive no formal training in business fundamentals. However, a significant portion of biomedical PhD students obtain employment in pharmaceutical, biotechnology, and other industries. For students with these career goals, formal training in business would markedly enhance their career options and competitiveness for these industry positions.
